- Ethical Decision-Making

PROJECTS

- Project Title: **"Portfolio Website"**
  - Developed a comprehensive portfolio project using HTML, CSS, and JavaScript to showcase technical skills and creativity.
  - Designed a responsive and visually appealing website, demonstrating proficiency in front-end technologies.
  - Implemented interactive elements and animations to enhance user engagement and create a dynamic user experience

- Project Title: **"Calculator App"**
  - Developed a fully functional calculator application using HTML, CSS, and JavaScript
  - Utilized JavaScript to handle user input, perform calculations, and display results dynamically on the web page

- Project Title: **"Weather Checker"**
  - Designed and developed a weather checker application to retrieve real-time weather data using a third-party API.
  - Implemented asynchronous JavaScript to fetch and display weather information based on user input (city name).
  - Styled the application with a clean and modern interface, providing users with easily digestible weather details

- Project Title: **"Todo List Application using React"**
  - Designed and developed a dynamic Todo List" application using React, showcasing proficiency in front-end development and state management. Implemented essential features such as adding, editing, and deleting tasks, along with status tracking for task completion. Leveraged React's component-based architecture to create a modular and scalable user interface.
